Figure 1: Influence of ERα- and ERß- selective ligands on ovarian wet weight in hypex immature Wistar
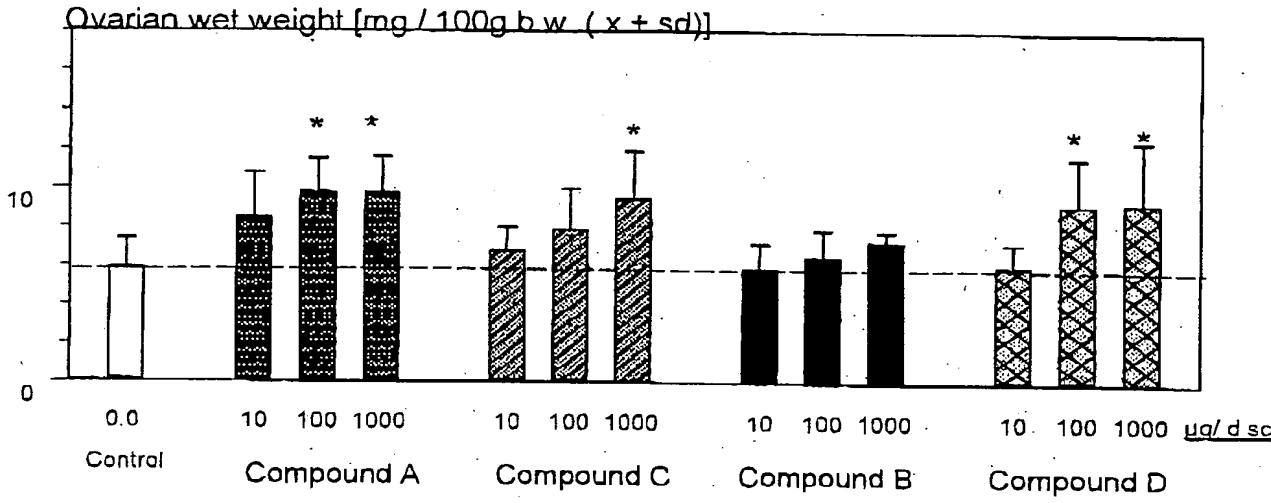

Figure 2: Influence of ERα- and ERß- selective ligands on folliculogenesis in hypex immature Wistar rats
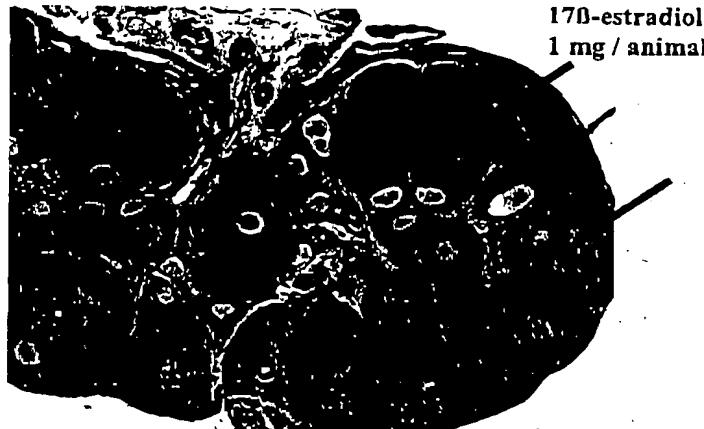

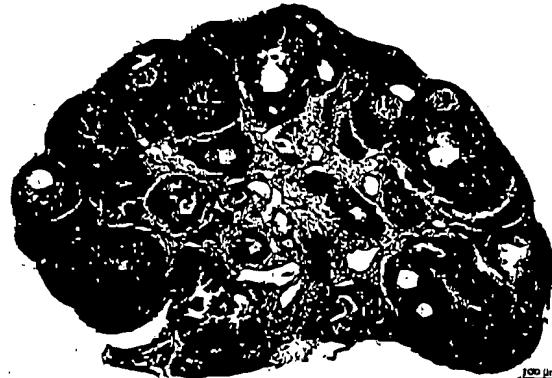

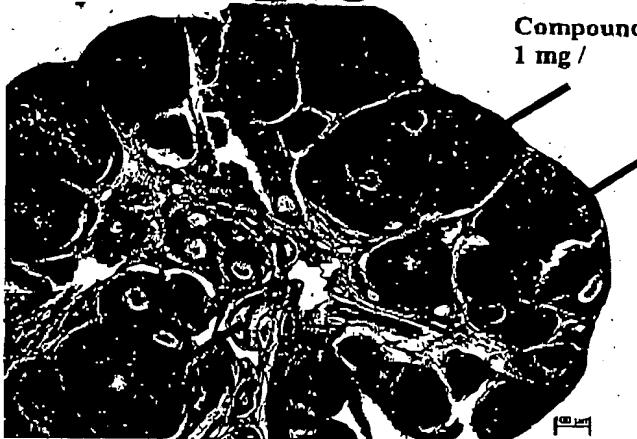

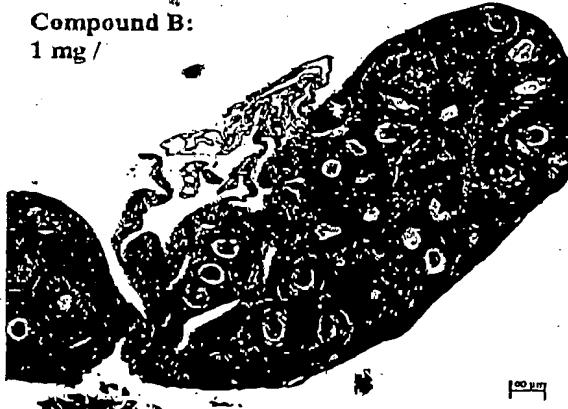

Histological sections, stained with hematoylin and eosin, of ovaries treated with vehicle, 17ß-estradiol, an ERα-selective ligand (Compound B) and an ERß-selective ligand (Compound D) are shown. *: atretic folicles, arrows: large preantral follicles.

Figure 3: Influence of ERα- and ERß- ligands on Folliculogenesis and Ovulation-rate in the HYPEX Immature Wistar Rat

control   17ß-estradiol   Compound B   Compound D
